SIT725- Applied Software Engineering
1.1P: Welcome Package and Skill Review

Hello, my name is *Aakash Kumar Raj Sakhineti*. I possess some good programming skills and fundamental knowledge of web development using HTML, CSS, JavaScript, and Node js. And App development using React Native EXPO for iOS & Android, I'm also having some basic and good fundamental knowledge about frameworks like React and Next. Js.

I am comfortable with core and intermediate concepts in JavaScript and I have intermediate level experience of using JavaScript in both front-end and backend development with Node js.

Although I have some initial experience by building some basic projects in my past Trimester using the above mentioned tech stack, now I am concentrating on solidifying basic principles in applied software engineering. My objective is to achieve a **Credit** grade, effectively managing this unit alongside with other responsibilities while ensuring practical proficiency in the curriculum provided.
